screenshots for version 2 implementaion

Challenge: Modify & Deploy

Your Mission

1. Modify the Kitchen App (change UI color, add a menu item, update API endpoint)
2. Rebuild the Docker image with a new tag (v2)
3. Update the K8s deployment YAML to use the new image
4. Deploy to Kubernetes and verify it works
5. Scale to 3 replicas and demonstrate self-healing

Scoring

- Docker image builds: 20 pts
- K8s deployment works: 30 pts
- App modification visible: 20 pts
- Scaling demonstrated: 15 pts
- Self-healing shown: 15 pts

Bonus Points

- Rolling update (v1 → v2): +10
- Resource limits set: +5
- Creative UI modification: +10
- Team presents their changes: +5

```
